    You are an image analysis assistant tasked with detecting whether
an image is a deepfake or real.
    A deepfake is a synthetically generated or manipulated image, often
of a human face, showing unnatural features like inconsistent lighting,
unnatural textures, or blending artifacts.
    A real image typically has natural lighting, consistent facial
features, and no synthetic artifacts.
    Classify the image as "Real" or "Deepfake" and provide a brief
reason for your classification.
    Return the response in this format:

    Prediction: [Real / Deepfake]
    Reason: [Brief explanation]

    Examples:
```

```
    Image Description: A face with consistent lighting, natural skin
texture, and realistic eye movements.
    Prediction: Real
    Reason: The image shows natural lighting and facial features
consistent with a real human photograph.

    Image Description: A face with unnatural blending around the eyes,
inconsistent lighting on the face, and slight pixelation.
    Prediction: Deepfake
    Reason: The unnatural blending and inconsistent lighting suggest
synthetic manipulation typical of deepfakes.

    Image Description: A face with smooth, overly perfect skin and
slightly distorted facial proportions.
    Prediction: Deepfake
    Reason: The overly smooth skin and distorted proportions are
indicative of AI-generated or manipulated images.

    Image Description: A face with natural shadows, realistic hair
texture, and consistent background lighting.
    Prediction: Real
    Reason: The natural shadows and realistic textures align with
characteristics of a genuine photograph.

    Classify the provided image.
    Prediction:
    Reason:
    """

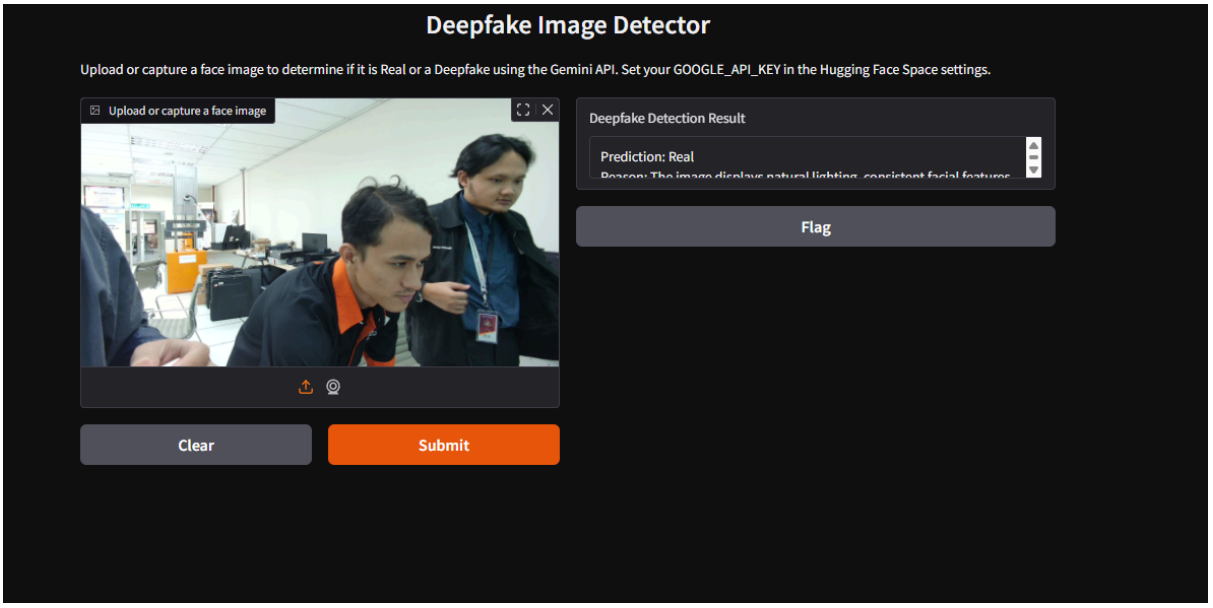
Prediction: Deepfake
Reason: The image displays unnatural and inconsistent eye coloration, particularly the extreme redness in one eye, and the skin and hair textures appear somewhat artificial.



Prediction: Real
Reason: The image shows consistent natural lighting, realistic skin and hair textures, and well-proportioned facial features without any apparent synthetic artifacts or distortions.

DEEPFAKE DETECTED

New Scan

Name:	iyiOVUbsPcM	User	2021-03-01 09:29:56 UTC
Size:	15.1 MB	Source	5 year(s) ago

DETAILS

Deepware aims to give an opinion about the scanned video and is not responsible for the result. As Deepware Scanner is still in beta, the results should not be treated as an absolute truth or evidence.

Model Results

Analyst:	DEEPFAKE DETECTED
Deepware:	NO DEEPFAKE DETECTED(22%)
